

**VEGASINO**

**LEAVE YOUR DIGNITY AT THE DOOR**

**WHITEPAPER**

## Introduction

Meet Vegasino, the latest and most ambitious casino on the Binance Smart Chain. With thousands of demonstrably fair games available to play, the platform accepts a variety of crypto currencies and tokens from multiple chains. If you have the itch to play, we have the means to get you up and running in a matter of seconds. The future is certainly bright with Vegasino, with a planned expansion to the metaverse being just one of the many developments planned for the project's roadmap.

Vegasino comes from the all-star team who brought you Nevada Casino. With multiple successful projects in their pockets, the Vegasino team has the experience, tools and links necessary to get the project trending on platforms that matter in the crypto space: Dextools, CoinMarketCap and PooCoin, among others.

## Mission Statement

The crypto-gambling sector is still in its infancy. With the launch of our first casino, we identified several aspects that could be improved upon to facilitate seamless interactions with the blockchain. Our players also had multiple suggestions for us.

As we move forward with Vegasino, we aim to incorporate this feedback and what we learnt into the new platform. This includes the ability to use multiple cryptocurrencies to play.

At launch, several currencies will be available to play with at the casino. Going forward, we will regularly add popular crypto currencies to our platform to facilitate the onboarding of new players and make the entire process more convenient for them.

At Vegasino, expect all the top cryptocurrencies to come together to make our casino the most played, most loved, and most talked about on multiple chains.

## Why Binance Smart Chain?

Binance Smart Chain (BSC) is best described as a blockchain that runs in parallel to the Binance Chain. Unlike Binance Chain, BSC boasts smart contract functionality and compatibility with the Ethereum Virtual Machine (EVM). The design goal here was to leave the high throughput of the Binance Chain intact while introducing smart contracts into its ecosystem.

BSC is an independent blockchain that could run even if Binance Chain went offline. That said, both chains bear a strong resemblance from a design standpoint.

Because BSC is EVM-compatible, it launched with support for the rich universe of Ethereum tools and dApps. In theory, this makes it easy for developers to port their projects over from Ethereum.

## Community

One of the benefits of launching Vegasino on BSC is the retention of our strong community. New investors can feel secure knowing this loved, tried and tested project has a huge community following. The team anticipates the relaunch will empower both our original and new investors, and Vegasino will soar to heights never thought of before. The team recognizes the overwhelming support of the original investors and strongly believes that this project with its steel-like foundation has nowhere else to go but up.

## Casino

Our casino is provided by Owl.games. The OWL team only works with prestigious gaming providers such as Evolution, MicroGaming and Pragmatic Play etc. This guarantees the fairness of the games provided. The reports can be found on our provider's website. The casino boasts thousands of games including favorites such as Table Games, Poker, and Slots to mention a few. The casino also offers sports betting.

The casino can be accessed on both mobile and desktop. To better protect the players the casino also offers a self-exclusion option, whereby a player can set limits on their expenditures.

Being on the blockchain, the players can expect deposits to be processed at super-fast speeds. The withdrawals process is just as fast: you will not be waiting for days to see your profits in your wallet.

Owl.games are owned and operated by the company Cyber Galaxy B.V. and it has a registered address at Franschebloemweg 4, Willemstad, Curacao. The License Number is 8048/JAZ. It is issued to Antillephone, and it is regulated by the Government of Curacao.

## Lambo or Rekt

Introducing our degen quick fix, Lambo or Rekt. Gamblers can simply connect to our dApp and go for double or nothing. The premise is simple: heads or tails. You have a 50% chance of winning... or losing! Lambo or Rekt is available on the BSC and FTM networks at start and we anticipate adding more networks in the future.

## 20% Buyback Casino Profit

Every month, Vegasino reserves 20% of the casino profits for buyback of its native token. This ensures a constantly rising floor for the \$VGS token and gives holders the assurance that Vegasino is a long-term project and a sound investment opportunity.

## Staking

Vegasino is one of the few projects on the Binance Smart Chain to offer an NFT utility. Aside from owning a cool piece of gambling history, NFT owners can expect to earn a generous 100% APR of the token for staking their NFT. Token holders can also stake their tokens to get 33% APY. The NFTs will be available on the Binance Smart Chain in the standard ERC721 format. They can be purchased on our project website at [vegasino.io](https://vegasino.io)

## In-depth features of the casino

Internet and the blockchain technology are convincing more and more consumers to go online for gaming and entertainment. The Vegasino business model aims to take advantage of this growing sector by focusing on a broad gaming service and a variety of use cases for its native token.

## **Decentralization**

One big issue with today's modern casino gaming platforms is that do not offer privacy to their users, which goes against principles of decentralization. For example, a traditional casino in Nevada requires information such as email and password registration, which needlessly exposes users' personal information to service providers. Moreover, it also puts their personal information at risk in case there are any data breaches.

But what if a user could access a casino using only their decentralized wallet, with no need for a FIAT connection or registration?

Our brand-new Vegasino offers users all the safety of an officially licensed casino without the hassle or worries of KYC/identification. Users of the Vegasino Casino platform are free to enjoy PVP Poker, Slots, and even Sportsbook Betting all from the comfort and safety of their own homes with no extra steps needed for verification.

## **Instantaneous, without hassle**

Nobody can deny that the most thrilling aspect of online casino gambling is the cashouts. However, depending on the type of withdrawals that a given online casino offers, the withdrawal process can vary considerably. To comply with national laws, most casinos now need to manually review withdrawal requests. This can take days to process.

Vegasino offers instantaneous and automatic withdrawals and deposits to give you an experience that is closer to the real casino experience than other online casinos. You will face no delays in withdrawing your winnings: take what is yours right on the spot like a real live casino! This also applies for Sports Bets cashouts Whereas other Sportsbook Apps/Websites have a 3–7-day delay for cashouts, you can ride that hot winning streak with no interruptions on the Vegasino Platform.

## **Adaptation of multiple crypto networks**

Vegasino's new multi-chain capabilities allows us to integrate other crypto currencies and tokens. This makes it easier and more convenient for players to start playing faster. This key new feature brings more revenue streams and generates greater visibility for the Vegasino platform.

The platform also allows other projects to add additional utility to their tokens. They may approach Vegasino for partnership, which essentially lets them have their own casino on the blockchain. They may secure these partnerships with a lumpsum payment or by sharing a cut of the profits that they earn from using the Vegasino platform.

Vegasino also plans to approach larger, more well-known and established projects to get them to list their token on our casino. This, in turn, will boost the revenue Vegasino pulls as well as the number of eyes on the platform.

## **Underage Gambling/ Gambling Addiction**

Vegasino takes gambling safety and responsibility very seriously. We have partnered with BeGambleAware.org to eliminate underage gambling and gambling from our platform. This partnership will provide us with the expertise on how to tackle addiction and underage gambling on the Vegasino platform, and help us reduce unsafe gambling practices. This will help create the ultimate online casino platform powered by the blockchain technology. For more information on our mission, please visit <https://www.begambleaware.org/>

## Tokenomics

## Security

The Vegasino smart contract will undergo various security audits to ensure that it is safe and secure. The first audit will be with InterFi, to be completed before launch. A CertiK audit for the new contract will also follow later.

The project will be listed on both CoinMarketCap and CoinGecko. The old contract (powering Nevada) was heavily audited, including by CertiK, and has been featured in many popular online publications. We are confident that the new contract will be just as robust and provide a solid foundation for the Vegasino platform.

## Roadmap

## Team

Our team of crypto connoisseurs hails from all over the globe:

### UNWISE TRADER

Unwise Trader has been a degen himself since he started his crypto journey in 2020. He is responsible for managing the staff and quality

### KAJRAK

Kajrak is a technology enthusiast with extensive cybersecurity experience. He manages all the data security and information system

### STARKESS

Starkess is a professional marketer with more than 4 years of experience in his field. He has assisted with and started many crypto projects

### KEVIN HYUNH

KH is one of the main strategists of the project. He is responsible for building and maintaining the engagement in a project with his expertise in building the community

### JON WAT

Jon is a professional community and project manager with more than 2 years in crypto project management and 10 years in team/community development experience

### PD CYPHER

PD is a known and established Marketing Manager with multiple successful projects and partnerships under his belt

## Closing Remarks

After the massive success of their first casino project, the team has decided to move forward with their strengthened insights paired with the community feedback to create the best blockchain casino. The future looks even brighter with Vegasino joining the metaverse, amid other planned developments.

## Acknowledgements

This Vegasino whitepaper is the initial support document that will inform potential investors and help guide the team in growing the project. We consider this whitepaper to be a dynamic document and will keep updating it with further information in future iterations.

Thank you for taking the time to read this document. If you have any other questions about our project, please do get in touch with us from the list of contacts below:
